Getting Started

C99 — preprocessor

cpp — C pre processor

→ depth first traverse

→ all the # shows at line sc n/s comes from

qemu-linux-gnu-gcc

qemu-mips

-driver   _uut   (unit under test)

return $f() ! = 12$

$f(int\ x,\ int\ y)$ R reduces optimisation

PARSE EXAMPLE

```
int   f( int x, int y) {
        return x+y;
}
```
